

# HAIR RECOVERY PROGRAM SP 55

CUTTING EDGE TECHNOLOGY

Pharma Hermetic

# PharmaHermetic

Hair loss, also called alopecia, is a disorder caused by an interruption in the body's cycle of hair production. Hair loss can occur anywhere on the body, but most commonly affects the scalp. On average, the scalp has 100,000 hairs that cycle through periods of growing, resting, falling out, and regenerating.

A hair growth cycle consists of three phases:

Growth phase  
**ANAGENE**  
3 years

Bulb regenerates itself then produces the hair shaft.

Resting phase  
**CATAGENE**  
3 weeks

End of shaft production Retraction and upward migration.

Hair falls  
**TELOGENE**  
3 months

Pause before expulsion (golf club structure). A new anagen phase can start.

## HAIR RECOVERY PROGRAM SP 55

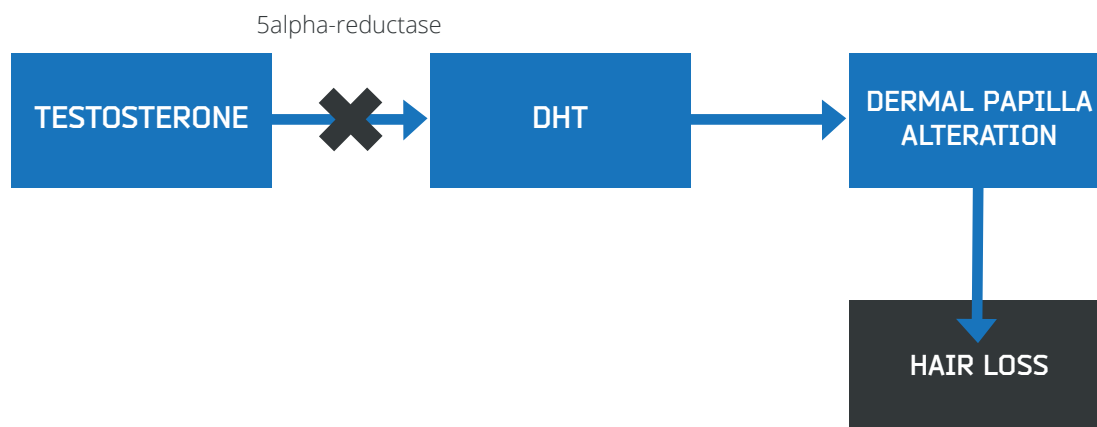

It works at the scalp level, revitalizing the hair bulb and obtaining a greater thickness and strength. Helps strengthen the anchorage of the root, the hair and rebalance the scalp.

The primary androgens - testosterone, pregnenolone, androstenedione and DHEA (dehydro - epiandrosterone) - normally regulate male and female sexual development and behavior by binding to receptors on target cells throughout the body.

Another androgen, dihydrotestosterone (DHT), has been identified by researchers as a cause of male pattern baldness. DHT is synthesized from testosterone by the enzyme 5alpha-reductase.

### FORMATION OF THE HORMONE DHT FROM TESTOSTERONE TO HAIR LOSS

PharmaHermetic

## HAIR RECOVERY PROGRAM SP 55

In addition, the Hair Recovery Program SP55, enhance the growth of new hair and activates dormant follicles thanks to its effective active ingredients. Providing all the necessary nutrients to repair the weakened and brittle hair. After the treatment, the hair is thicker and more voluminous.

We rely on ingredients suitable to penetrate the scalp and stop hair loss.

- ✿ Thicker hair
- ✿ More density
- ✿ No side effect
- ✿ Topical application
- ✿ Lasting results

## HAIR RECOVERY PROGRAM SP 55

A complete strategy must be used to fight hair loss back, including an insideout approach with scalp treatment and an inside-out rout to supply hair stem cells with all specific nutrients and ions they need.

The Hair Recovery Program SP55 reduce the inflammation and provide better supply of the key ingredients for healthy cellular growth.

- ❖ Prevention of hair loss must consider both increasing life length of hair stem cells and balance the scalp nutrition.
- ❖ Hair loss is a complete process influenced by diet, stress, etc. We must use a combined strategy considering both aspects.
- ❖ The Hair Recovery Program SP55 is a topical solution designed for people suffering hair loss that work from the outside in, to support the stem cells in the follicle.

## REPORT ON PHARMA HERMETIC'S HAIR REPLACEMENT PROGRAMME

I am the head Trichologist and Managing Director of Eucaderm Ltd, Britains leading trichologists.

I have worked for the Company for many years and in that time I have received many so called cures for today's hair problems. So when I was approached by Pharma Hermetic I was a little sceptical .However I was determined to give it a try because it was natural and that is our philosophy.

I have to say that I did part of my own treatment to make sure that the scalp was really clean and fully stimulated before using Hermetic HAIR RECOVERY PROGRAMME.

We did as we were instructed, paying particular attention to the hygienic aspect of the treatment. We used one derma-roller per client and the lotion was administered with a syringe, which ensures the lotion goes exactly where it is needed.

We were fortunate enough to photograph our clients from day one following through to the tenth week. The results were quite incredible as the pictures we have supplied Pharma Hermetic show.

As an aside, I have been bald for many years and so I treated myself to a daily application of the lotion. For the first time in many years I am growing hair, not a lot but it is a start. We have found it to be one of the greatest contributions to thinning hair and we will certainly continue recommending the HAIR RECOVERY PROGRAMME to our clients and to anybody who is interested in keeping a good head of hair.

Signed this 22nd Day of April 2018.

**Eucaderm LTD**  
**Mr. David Satchell**

## AKADEMİ SAÇ TERAPİ

16/04/2019

It is a privilege for us to write this reference letter for Pharma Hermetic Hair Recovery Program. We are pleased to inform that we have been using this treatment for 6 months in our Trichology Clinic, in Istanbul, Turkey.

We both combine Hair Recovery Program with our own trichological treatments in the clinic and recommend it as a Home Treatment on its own. So far we have used 15 kits of the treatment with both male and female patients who suffer from Androgenetic Alopecia especially. We have been receiving very positive feedbacks and satisfactory results. We observe that the treatment is promoting hair growth, improving hair density and producing thicker hair.

We have great pleasure to recommend Pharma Hermetic Hair Recovery Programme to all the health professionals, to experts in hair care field, to patients and finally to anybody who wants to improve their hair quality and prevent hair loss and prevent Androgenetic Hair Loss from progressing. This very special formula deserves to be appreciated by many other companies operating in hair care business.

Sincerely,

**Evrım Bayraktar, MIT**

Qualified Trichologist

Member of The Institute of Trichologists, UK

Member of European Hair Research Society

## APPLICATION PROTOCOL PHIALS

- Dry-hair application
- Massage the scalp to improve vasodilation
- Use a dermo roller (0.5 Millimeteres)
- Massage one phial in the scalp
- Use again the dermo roller
- Wait 5 min for full absorption
- Avoid direct sunlight after every session – 8h
- Do not shampoo after the session – 8h

## APPLICATION PROTOCOL PHIALS

- Apply one phial every 10 days. (5 phials – 50 days standard treatment)
- Maintenance of 1 phial every 30 days

## APPLICATION PROTOCOL AMPOULES

- ✿ Dry hair/beard application
- ✿ Massage the target area to improve vasodilation for 5 min.
- ✿ Apply one ampoule of 2 ml
- ✿ Massage the target area until complete absorption - 5/10min

## RECOMMENDATIONS

- ✿ Avoid sunlight for 8 hours after the session.
- ✿ Do the application at night.
- ✿ Do not wash the hair/beard after the application for 8 hours.
- ✿ Apply one ampoule every 3 days for hair and beard.
- ✿ Apply one ampoule every 7 days for eyebrows.
- ✿ 60 days standard treatment for hair and beard.
- ✿ 70 days standard treatment for eyebrows.
- ✿ Maintenance of 1 ampoule every 15 days for hair and beard.

## APPLICATION PROTOCOL LOTION

- ✿ Dry hair/beard application.
- ✿ Massage the area to improve the vasodilation.
- ✿ Apply enough lotion to cover the target area.
- ✿ Massage the area until complete absorption - 3 min.

## RECOMMENDATIONS

- ✿ Avoid sunlight for 8 hours after the session.
- ✿ Do the application at night.
- ✿ Do not wash the hair/beard after the application for 8 hours.
- ✿ Daily application.
- ✿ One Hermetic Lotion as standard treatment for hair and beard.
- ✿ Maintenance of one application per week.

## HERMETIC SHAMPOO

Hermetic shampoo without sulfates or parabens that synergistically combines several multi-effect active ingredients. Those ingredients help protein synthesis by stimulating hair growth, enhance the regenerative capacity of the follicle, anchor the hair bulbs by increasing hair density, strengthen the hair follicle to prevent hair breakage and inhibit 5-a-reductase by reducing excess of sebum that weakens the hair.

In addition, it is formulated with menthol that provides freshness and extremely mild surfactants that clean in depth, respecting the scalp and capillary structure, prolonging the life of the hair and strengthening it from the roots, achieving healthier and stronger hair.

### AMONG A LARGE NUMBER OF KEY ACTIVE INGREDIENTS, WE HIGHLIGHT:

#### HYDROLYZED RNA AND DNA:

They intervene by enhancing the keratin synthesis metabolism, thus strengthening the hair structure. Once applied to the scalp, it will hydrolyze, breaking into small pieces including deoxy-D-Ribose, amino acid nitrogenous bases and phosphoric acid. All these nutrients are those that the cell will use to repair or reconstitute its own DNA and enhance the regeneration of the follicle, improving and strengthening the condition of the hair.

#### TRACE ELEMENTS:

It contains a mixture of various elements such as Cu, Zn, Fe, Si and Mg that affect the metabolic balance of the scalp.

They inhibit 5-a-reductase avoiding the formation of DHT and therefore reducing excess sebum that weakens the hair until it reaches baldness.

#### HYDROLYZED KERATIN:

Keratin is the major protein in hair. The sulfur amino acids it contains favor the restoration of damaged hair fibers, restoring body, volume and vitality to the hair. Thanks to its conditioning power, it improves shine, helps eliminate frizz and prevents the formation of split ends.

#### SODIUM ASCORBYL PHOSPHATE:

Stable vitamin C that stimulates collagen and elastin biosynthesis, improving skin elasticity and protecting skin and scalp from the oxidative process by neutralizing free radicals. Provides luminosity and evens the skin tone, improving the appearance of the face.

**How to apply:** Apply to hair, previously wet. Massage and leave it to act for 5 minutes. Finally rinse with plenty of warm water.

## HAIR MASK

Hermetic Hair Mask - specially formulated for dry and damaged hair due to exposure to external environmental, thermal and chemical factors. Contains hyaluronic acid, mango butter, shea, and grapeseed oil. This mask helps improve hydration, nutrition and resistance to hair breakage. It also provides an extraordinary conditioning effect, flexibility and shine to the hair.

### Among other ingredients, we highlight:

#### **SODIUM HYALURONATE**

Polysaccharide that is naturally present in the dermis and is one of the protagonists of skin turgor and hair rejuvenation.

It has a strong moisturizing power, as it is capable of retaining a large amount of water in the hair, which is gradually released, thus maintaining adequate hair hydration. In this way, it combats dryness, breakage and loss of shine and is easier to style.

#### **PANTHENOL**

Panthenol is a B group vitamin that acts as a nutritional factor for the hair follicle, in addition to protecting, hydrating, softening and lightening the hair. Its properties include:

- Nutritional agent for the hair follicle.
- Improves elasticity, prevents breakage and facilitates styling.
- Repairs damaged hair.
- Provides shine and resistance.

#### **VITIS VINIFERA SEED OIL**

Grapeseed oil is rich in antioxidants and fatty acids. It is used in cosmetics, since it acts as a great cell repair and regenerator (ideal for damaged hair), it helps to combat dryness due to its high hydration power, in addition to protecting the hair due to its antioxidant action and improving its elasticity, leaving it more flexible and rejuvenated.

#### **INDICA SEED BUTTER HOSE**

It is a natural moisturizing product with a high content of fatty acids to protect the skin and hair. Mango butter restores suppleness and smoothness, making it suitable for body and facial care products, as well as hair care, sun care, soap, and makeup.

#### **BUTYROSPERMUM PARKII BUTTER**

Shea butter is known for its protective and moisturizing properties thanks to its content of oleic acid and vitamins A and E. In addition, it restores hair shine.

**INSTRUCTIONS FOR USE:** Apply the mask on damp hair and scalp in sufficient quantity. Massage and comb the hair with your fingers several times. Leave on for 5 to 15 minutes and rinse with plenty of cold water.
