The safest and most comfortable HIFU  
 for non-Surgical Face & Body  
 Lifting and Tightening

## The best HIFU for superb face lifting result

SonoQueen delivers micro-focused ultrasound energy (up to 1.2J) to dermal and SMAS (Superficial Muscular Aponeurotic System) layers in a non-invasive way using HIFU (High intensity focused ultrasound) technology for face lifting, skin tightening and wrinkle treatment.

- ⊕ Precise focusing and thermal energy delivery
- ⊕ Adequate output by high purity transducer
- ⊕ Patented special JIG for cartridge inspections
- ⊕ Most comfortable treatment for patient without pain
- ⊕ Specially designed 2mm Single dot treatment cartridge for around eye and lips area
- ⊕ Long-endurable and effective cartridges
- ⊕ Immediate and expectable results
- ⊕ Portable and great mobility

## Applications with SONOQUEEN

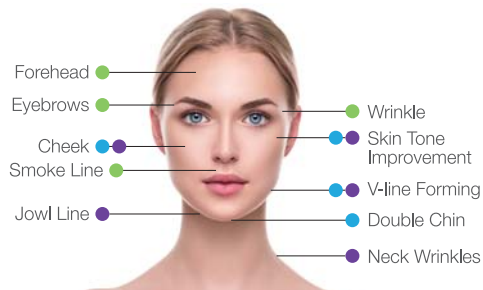

S7-2mm(7Mhz)

M7-3.0mm(7Mhz)

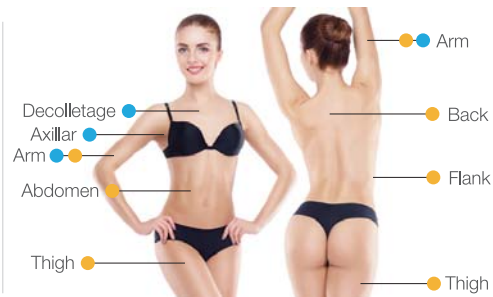

M4-4.5mm(4Mhz)

B6-6.0mm(4Mhz)

### For face

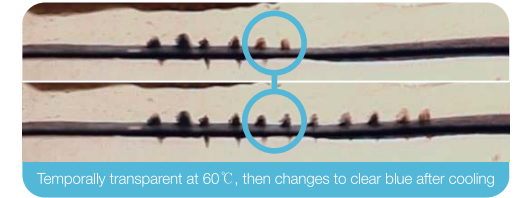

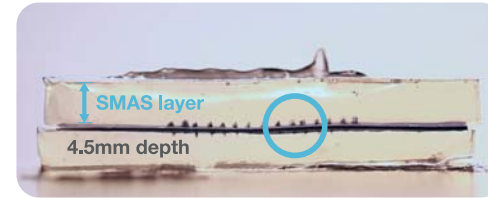

### For body

# SONOQUEEN Technologies

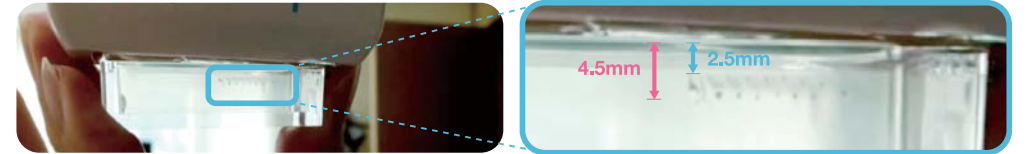

## Precise focusing and thermal energy delivery

Thermochromic Dye in which blue capsule changes (blue to Transparent) at 60°C threshold was used for imaging energy transmission in a phantom.

## Most comfortable treatment without pain

- Thermal coagulation point (TCP) depth control through 100% cartridge inspection by special JIG
- Superb safety : No scratch on skin surface

## 2mm Single dot treatment cartridge

- Nonlinear : Single dot treatment
- Accurate, effective and convenient treatment
- The smallest tip for around eye and lips area
